

MODEL OPTIONS

18-hole lead acid (£429).
Lithium battery (£649).
Lithium brake (£699)

KEY TECHNOLOGY

The Powakaddy Sport combines strong, lightweight materials with a new simplified control and display unit. The button control on the Freeway II has been replaced by a new roller mechanism that makes it easier to set the speed for both right and left handed golfers. A three-way folding mechanism is combined with an aluminium frame in white, black or graphite.

WILL SUIT

- Golfers in the market for a quality, easy to use electric trolley
- Those after a stylish design

GM VERDICT

The most stylish-looking trolley on the market thanks to the sporty wheels and the sleek frame. The ambidextrous control panel is a big improvement on the button design and setting the speed is easier. The screen features less information and is easier to follow. The Lithium brake version is great on a hilly course as the trolley doesn't roll back on slopes. Take into account the type of course you play before choosing a model.

By Paul O'Hagan

GM VERDICT

- ➕ Stylish looks are combined with a lightweight and easy-to-use design – this is a big improvement on the Freeway II. An extended two-year warranty is also a reassuring bonus.
- The Lithium brake is a fantastic offering, but takes the trolley into real high-end prices.

PGA PRO VERDICT

The best feature is the control panel that can now be used by left and right-handers. It's friendly ergonomic handle makes it easy to direct. The main body design retains its original features, with its quick assembly and it also stands upright after folding, which is handy. My only criticism is the 'T bar' unit they use for battery connection and charging is a little tricky to connect.
